

EXPLORER CLASSROOM

GO ON A VIRTUAL FIELD TRIP WITH A NATIONAL GEOGRAPHIC EXPLORER!

Explorer Classroom connects youth directly with National Geographic Explorers—groundbreaking scientists, conservationists, and storytellers helping to change our world for the better. These individuals and their critical work inspire students to learn more about the planet and how it works.

Every Explorer Classroom session is different. Young people could travel to the depths of the Rising Star Cave System in South Africa, or visit a penguin colony in Antarctica.

This #LightsOnAfterschool Specials is supported by the Charles Stewart Mott Foundation.

All sessions are live events hosted on YouTube and free to join.

Tuesday, October 23
3:15pm - 4:15pm Eastern Time Visit the Exploration Vessel Nautilus and explorers working under the ocean!

Wednesday, October 24
3:00pm MT/4:00pm CT
Talk with fish scientist Joe Cutler about how he tracks fish in Africa!
