Be a Technovation Moonshot Ambassador

Bring Technovation's technology entrepreneurship program to girls in your community. Support 30 or more girls through a 12-week coding and entrepreneurship program and to help them become leaders and innovators in their community. *No experience in tech is required.*

Selected Technovation Moonshot Ambassadors will receive **$5,000 stipends** to support their Technovation pilot, and be eligible for additional mini grants.

Are you a motivated program director or specialist working with three or more sites or programs?

Are you interested in going deeper through awesome project-based learning?

Do you believe girls should have access to technology and entrepreneurship programming?

Do you have places for 30 girls to meet and access computers & internet?

Do you serve youth who are underrepresented in STEM careers?

76% of alumnae are pursuing STEM degrees

60% of alumnae are working in STEM careers

60% of alumnae credit Technovation for their career choice

50% of alumnae have been recognized for leading change in their communities

WestEd Alumni Survey Report

What is Technovation?

Technovation empowers girls to use technology to solve real-world problems, building their 21st century skills critical to them becoming leaders and problem solvers. Over the past 16 years, Technovation has engaged over 350,000 children, parents, and volunteers in over 120 countries around the world through evidence-based STEM programs.
